

## QUALITY POLICY

ViaMedPharma supplies medical devices and technology to customers in Lithuania, Latvia and Estonia.

ViaMedPharma commenced operations in 2010, and it has become one of the most reliable partners for its customers, specialists, and suppliers in Lithuania, Latvia and Estonia.

ViaMedPharma's outlook is specialisation and goal-oriented work.

ViaMedPharma's main strategic operating principle is to keep improving and to keep monitoring the latest technology and solutions in the medical field and to pass on the knowledge gained to our clients, thus promoting the introduction of advanced technologies in the field of medicine.

In order to be a viable and competitive company, ViaMedPharma is committed to:

- being guided in its operations by legislation and the other requirements that the company undertakes to carry out;
- analysing market needs and customer requirements, and assessing its own capabilities and product sales possibilities;
- providing its clients with the most advanced solutions in the field of medicine;
- working as a team with its clients and partners, pursuing common goals;
- choosing partners responsibly, working only with those whose products meet the requirements set by the company;
- arranging continuous professional development of employees and customers.

For the implementation of this policy, ViaMedPharma has produced and continually maintained and improved a quality management system, which meets the requirements of Standard LST EN ISO 9001:2015. The company ensures compliance with requirements by regularly arranging internal and independent external audits. The company uses the results of these audits and will continue to effectively use them in the future in performing evaluative analysis of management processes, and adopting important strategic solutions in relation to its operations and future expansion.
